

ABS ECU

Anti-lock Braking System Electronic Control Unit

FEATURES AND BENEFITS

Anti-lock Braking System Electronic Control Units (ABS ECU's) are complex components that are vital to brake system performance. Not only do ABS ECUs control critical functions of the braking system, they constantly send, receive, and store incredible amounts of information. DTNA Reman's years of experience provides high-quality, thoroughly tested cab and frame mounted ABS ECU's that were developed to restore reliable functionality.

- **Assured Quality Standards:** Rigorous inspection of every component after complete disassembly and cleaning. Ambient & hot tested to validate performance in simulated operating temperatures.
- **Industry Leading:** Original components or validated equivalents for cab and frame mounted models are used in the reassembly process. Industry leading processes in an ESD (electrostatic discharge)-Safe environment establish customer confidence in product quality and reliability.
- **Cost of Ownership:** A Reman option provides an economical choice while maintaining the same standards and functionality as Genuine.
- **Comprehensive Testing:** Functionally tested with the latest software and reset to original defaults. Voltage-tested to ensure proper readings at both elevated and reduced voltage levels. Internal drivers are load-tested to ensure they are functioning at full power. Sensor inputs are tested and driven through all operating ranges.

CROSS REFERENCE

E4 PART NUMBERS

REMAN PART NUMBER	GENUINE PART NUMBER	DESCRIPTION
DDR 400 860 000 OR	WAB 400 860 000 O	REMAN PABS ECU E4F 12V
DDR 400 864 009 OR	WAB 400 864 009 O	REMAN PABS ECU E4C 12V 4S4M PLC W/ ATC O
DDR 400 864 624 OR	WAB 400 864 624 O	REMAN PABS ECU-ABS,4S4M,E-CAB,HSA

E8 PART NUMBERS

REMAN PART NUMBER	GENUINE PART NUMBER	DESCRIPTION
