Alliance HVAC Condensers

Product Features and Benefits

FEATURES

- Manufactured to strict ISO/TS 16949 OE quality standards
- Zinc coated tubes to combat salt corrosion
- High efficiency welded tubes provide greater strength and reliability
- All brackets and fittings made with virgin aluminum to provide maximum strength in brazing bond
- Folded fin edge design provides increased stability and heat disbursement properties
- Original equipment reliability, performance, and fit
- Alliance Condensers are backed by a 1-year / unlimited mile warranty
- Available at DTNA PDC Network in USA and Canada

HIGHLIGHTS

- Alliance Condensers are engineered for optimal performance and longevity
- Parallel flow core design maximizes cooling efficiency
- 100% of Alliance Condensers are pressure-tested with helium to ensure leak-free parts out of the box
- Tube and fin construction yields maximum heat transfer and performance during pressure drop
- ISO 14001 compliant manufacturing plant (environmental management system)
- Great selection of fast moving part numbers

- All parts are individually serialized with manufacturing batch code information
- Packaged with pre-formed high-density foam inserts for maximum protection
