

ConMet Disc Brake Rotors

# ConMet® PreSet® Hub and Rotor

ConMet

## Watch on

Disc brakes offer improved stopping distance when compared to drum brakes, which translates into safer and more consistent vehicle performance. With both air and hydraulic disc options, ConMet's PreSet and PreSet Plus Hub & Rotor Assemblies are available for all axle positions and in any configuration required to perfectly mate with just about every vehicle's brake component system. Additional benefits of air disc brakes include:

- Improved handling and stability
- Lower life cycle cost
- Reduced temperature of brake components
