## Asymmetric Cross View Mirror System

The Eye-Max LP™ represents the next step in the evolution of cross view mirrors. It improves on the performance of the already successful Hawk-Eye™ and Mini-Hawk-Eye™ mirrors that have been the “Workhorses” of the school bus industry for the past fifteen years. The novelty of the Eye-Max LP™ is the revolutionary asymmetric shape of its mirror lens. Different sections throughout the mirror yield optimum viewing parameters for specific danger zones around the bus. These asymmetric mirror divisions are designed to increase image-size and coverage in all areas around the bus.
