Product Highlights - Mobil and Detroit Genuine Engine Oils

Excellent Wear Protection

- Stay-in-grade shear stability maintains viscosity in severe, high-temperature service, provides wear protection and helps reduce oil consumption.

For Long Engine Life

- Helps Extend Engine Life Excellent anti-wear and anti-scuff properties help control wear in heavy-duty operation to help promote long engine life.

Extreme High Temperature Performance

- Stands up to the thermal stresses caused by the harsh, operating conditions found in the trucking, mining, construction, and agricultural industries

Improved Fuel Economy**

Low viscosity fully synthetic engine oils can help support, engine efficiency and enhance fuel economy potential** by decreasing engine friction and offering exceptional flow characteristics at low temperatures. **Relative to conventional 15W-40 engine oil. Actual fuel economy improvement is dependent on vehicle/equipment type, outside temperature, driving conditions and your current fluid viscosity.

Selected as Detroit Factory Fill Engine Oil

- New Detroit engines are build and tested using Mobil's formulation of FA-4 specification oil.
