

ALLIANCE PARTS

Alliance - Height Control Valve

Height control valves are designed to provide good performance in inflating and exhausting air springs (for both vehicle and cabin suspension) to maintain constant suspension ride height regardless of the load of the vehicle and the condition of the road, thus ensuring optimal vehicle handling and best drive comfort.

Product Highlights

Semi-automatic assembly line and 100% out factory inspection by computer-wised test bench, ensuring stable quality.

Products are validated by qualified and independent test lab, including endurance and extreme climatic conditions tests.
