Product Highlights

2000 Series - Air

- The 200 series air operated cross arm is designed with simplicity in mind, with very few moving parts and simple air diaphragm which makes this unit virtually trouble free.
- Constructed from steel that is properly coated for corrosion resistance.
- Extruded high strength plastic arm.
- Mounting brackets available to further secure stowing into the bumper.
- Easy Serviceability.

7 Series

- The 7 series Solid State electrically operated cross arm is designed with simplicity in mind. It has fewer moving parts and is constructed from die cast steel that is properly coated for corrosion resistance. Exterior metallic parts are powder coated and e-coated for added corrosion resistance.
- Sealed solid state mechanism with no micro switches or relays.
- Extruded high strength plastic arm.
- Mounting brackets available for all chassis configurations.
- Optional electromagnet available to further secure stowing into the bumper.

- Internal Grounding.
- Available with quick disconnect.
- Easy Serviceability.
