Core Receiving and Inspections

All incoming core is received, inspected, and tested to confirm the core module's root cause failure mode.

Core Teardown

After the inspection process, all core is sorted, torn down, and prepared for recovery processes.

Product Recovery

Product recovery is executed in a clean, static free environment that allows core multiplexing modules to be remanufactured to OEM specifications.

Functional Testing

Remanufactured multiplexing modules are all functionally tested prior to shipping.

Product Availability

All remanufactured multiplexing chassis modules are available within the DTNA PDC Network.

General Product Information

Remanufactured multiplexing modules from Detroit REMAN provide a cost-effective alternative to new parts with performance, durability and reliability that meet or exceed the original equipment manufacturer. Not simply a rebuild, our remanufacturing process begins by using only high-quality cores and replacement components. Combine this with industry leading remanufacturing experience and expertise, we deliver engine components you can trust.
