

PARTSCAP

Alliance Allison Automatic Transmissions

DTNA Parts is proud to offer the Alliance variant of the top moving Allison Automatic Transmissions.

This Value offering has been released to the DTNA Network to offer our customers a cost effective solution to get them on the road with reduced down time.

Reduced pricing on select Part Numbers as of 4/1/2024!

Features & Benefits

Core Receiving and Inspection

All incoming core is 100% torn down and inspected.

Product Recovery

All transmission components are 100% inspected and measured against OEM specification.

Consumable and wear items (i.e. Bearings & Seals) are replaced 100%.

Assembly components are measured & gauged using CMM / Air Gauging / Electronic Measurements.

Product Assembly

Transmission assembly is conducted in a control production environment that modeled from the Detroit OEM process.

Standards and Best Practices have been adapted and implemented from the Detroit Production Environment.

Quality Control and product auditing is standard practice within the Assembly Environment.

Function Testing

100% of all assembled transmissions are subject to End of Line (EOL) Dynamometer Test.

Transmission dynamometer testing is conducted in similar fashion to the OE Process.

All transmissions are subjected to Speed / Load testing that is representative to over the road conditions.

All forward and reverse gears are functionally tested and verified.

NVH Measurements are conducted to ensure assembly of the transmission is correct.

All test results are captured and stored for Quality Control purposes.

Product Availability

Alliance Allison Transmissions are proudly manufactured in the USA with immediate availability!
